

The extension to life expectancy means that a 60-year-old baby boomer today could have 32 years in retirement

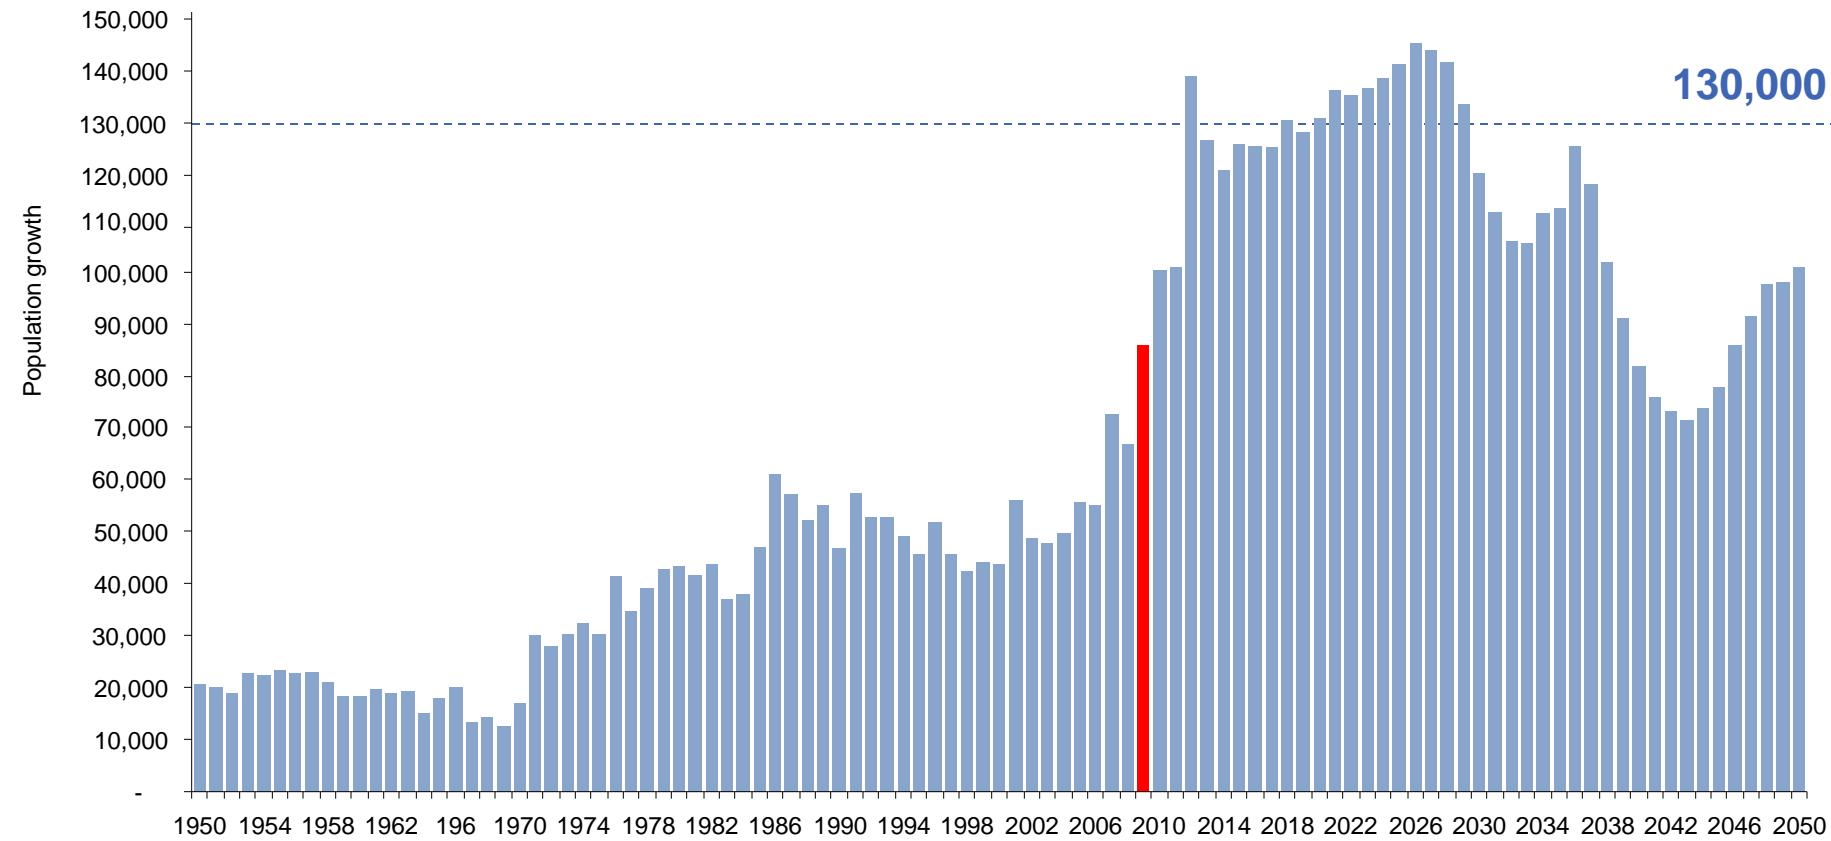

The issue of retirement planning and funding must escalate in the coming decade

1950

2000

2050

- Net growth in population (65+) over 100 years in Australia

We need to think differently about life's later years ... almost one million 80-somethings are headed for the frail 90's

60

Portfolio Lifestyle
2.0m → 2.8m
